SUBJECT INDEX

Abrasion
abrasive wear of graphite fibre-reinforced polymer composite, 97
abrasive wear resistance: the effects of ploughing and the removal of ploughed material, 239
Additives
films formed by antiwear additives and their incidence in wear and scuffing, 41
Antiwear
films formed by antiwear additives and their incidence in wear and scuffing, 41

Bearings
analysis of an arbitrarily misaligned self-acting gas film journal bearing of finite length, 367
analysis of a big-end bearing — a finite element approach, 275
Boron
laser melt injection of BN powders on tool steels, I: microhardness and structure, 19

Carbon
the effect of normal damping in the loading system on the wear of low C steel, 73
Cermets
effects of composition and microstructure on the slurry erosion of WC–Co cermets, 1
Coal
modelling durability of coal grinding systems, 29
Cobalt
effects of composition and microstructure on the slurry erosion of WC–Co cermets, 1
Composites
abrasive wear of graphite fibre-reinforced polymer composite, 97
analysis of wear statistics for polymer composites, 223
Contacts
microscopic normal displacement of contacting bodies with tangential load, 339
a thermodynamical model of contact, friction and wear: I governing equations, 135
a thermodynamical model of contact, friction and wear: II constitutive equations for materials and linearized theories, 169
a thermodynamical model of contact, friction and wear: III constitutive equations for friction, wear and frictional heat, 199
Cutting
evaluation of cutting fluid effectiveness in machining using electrochemical techniques, 51

Damping
the effect of normal damping in the loading system on the wear of low C steel, 73
Diamond
some remarks on the chemical wear of diamond and cubic BN during turning and grinding, 327
Durability
modelling durability of coal grinding systems, 29
surface durability of shaved gears, 295

Electrochemical techniques
evaluation of cutting fluids effectiveness in machining using electrochemical techniques, 51
Electroplating
friction between soft metal and hard thin films electroplated on a softer substrate, 309
Erosion
effects of composition and microstructure on the slurry erosion of WC–Co cermets, 1
an impact and erosion study of polyetheretherketone, 59

Fibres
abrasive wear of graphite fibre-reinforced polymer composite, 97
Films
analysis of an arbitrarily misaligned self-acting gas film journal bearing of finite length, 367
films formed by antiwear additives and their incidence in wear and scuffing, 41
Finite element analysis
analysis of a big-end bearing — a finite element approach, 275
Fluids
evaluation of cutting fluids effectiveness in machining using electrochemical techniques, 51
Friction
friction between soft metal and hard thin films electroplated on a softer substrate, 309
the friction and hardness of ion-implanted sapphire, 85
frictional heat grenerated in the early stages of an orbital friction welding process, 355
a thermodynamical model of contact, friction and wear: I governing equations, 135
a thermodynamical model of contact, friction and wear: II constitutive equations for materials and linearized theories, 169
a thermodynamical model of contact, friction and wear: III constitutive equations for friction, wear and frictional heat, 199
Frictional heat
a thermodynamical model of contact, friction and wear: III constitutive equations for friction, wear and frictional heat, 199

Gears
surface durability of shaved gears, 295
Graphite
abrasive wear of graphite fibre-reinforced polymer composite, 97
Grinding
effect of impact on the grinding media and mill liner in a large semiautogeneous mill, 249
modelling durability of coal grinding systems, 29
some remarks on the chemical wear of diamond and cubic BN during turning and grinding, 327

Hardness
the friction and hardness of ion-implanted sapphire, 85

Impact
effect of impact on the grinding media and mill liner in a large semiautogeneous mill, 249
an impact and erosion study of polyetheretherketone, 59
Ion-implanted sapphire
the friction and hardness of ion-implanted sapphire, 85

Lasers
laser melt injection of BN powders on tool steels, I: microhardness and structure, 19
Loading
the effect of normal damping in the loading system on the wear of low C steel, 73

Machining
evaluation of cutting fluids effectiveness in machining using electrochemical techniques, 51
Melting
laser melt injection of BN powders on tool steels, I: microhardness and structure, 19
Metals
friction between soft metal and hard thin films electroplated on a softer substrate, 309
Mill liner
effect of impact on the grinding media and mill liner in a large semiautogenous mill, 249
Molybdenum
preparation and properties of different types of sputtered MoS_2 films, 263

Nitrides
laser melt injection of BN powders on tool steels, I: microhardness and structure, 19

Ploughing
abrasive wear resistance: the effects of ploughing and the removal of ploughed material, 239

Polyetheretherketone
an impact and erosion study of polyetheretherketone, 59
Polymers
abrasive wear of graphite fibre-reinforced polymer composite, 97
analysis of wear statistics for polymer composites, 223

Sapphire
the friction and hardness of ion-implanted sapphire, 85
Scuffing
films formed by antiwear additives and their incidence in wear and scuffing, 41
Semiautogenous mill
effect of impact on the grinding media and mill liner in a large semiautogenous mill, 249
Slurries
effects of composition and microstructure on the slurry erosion of WC–Co cermets, 1
Steel
the effect of normal damping in the loading system on the wear of low C steel, 73
laser melt injection of BN powders on tool steels, I: microhardness and structure, 19
Sulphur
preparation and properties of different types of sputtered MoS_2 films, 263
Surfaces
surface durability of shaved gears, 295

Thin films
friction between soft metal and hard thin films electroplated on a softer substrate, 309
Tribotesting
multilaboratory tribotesting: results from the Versailles Advanced Materials and Standards Programme on wear test methods, 109

Tungsten carbides
effects of composition and microstructure on the slurry erosion of WC–Co cermets, 1

Versailles Advanced Materials and Standards Programme
multilaboratory tribotesting: results from the Versailles Advanced Materials and Standards Programme on wear test methods, 109

Wear
abrasive wear of graphite fibre-reinforced polymer composite, 97
abrasive wear resistance: the effects of ploughing and the removal of ploughed material, 239
analysis of wear statistics for polymer composites, 223
the effect of normal damping in the loading system on the wear of low C steel, 73
films formed by antiwear additives and their incidence in wear and scuffing, 41
multilaboratory tribotesting: results from the Versailles Advanced Materials and Standards Programme on wear test methods, 109
some remarks on the chemical wear of diamond and cubic BN during turning and grinding, 327
a thermodynamical model of contact, friction and wear: I governing equations, 135
a thermodynamical model of contact, friction and wear: II constitutive equations for materials and linearized theories, 169
a thermodynamical model of contact, friction and wear: III constitutive equations for friction, wear and frictional heat, 199
Welding
frictional heat generated in the early stages of an orbital friction welding process, 355
